

IELTS Line Graph Examples

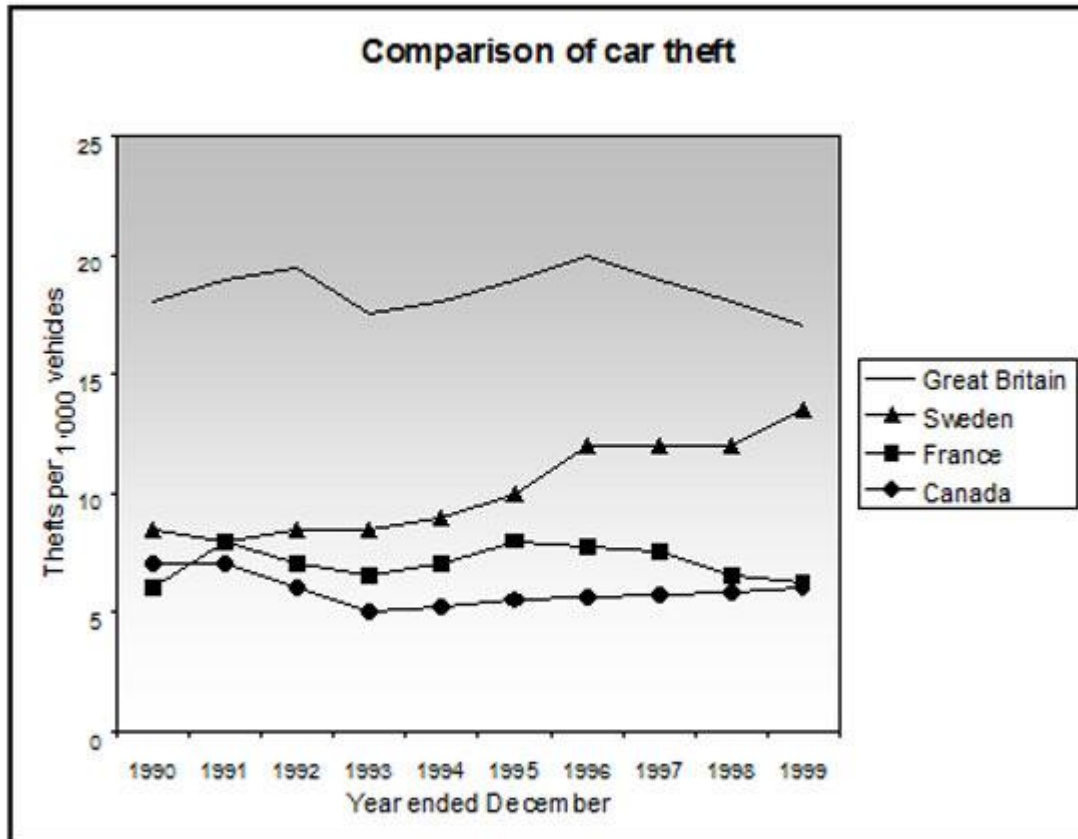

Continuing with the sites IELTS line graph examples, this is an example of a line graph comparing car theft.

You should spend about 20 minutes on this task.

The line graph shows thefts per thousand vehicles in four European countries between 1990 and 1999.

Summarize the information by selecting and reporting the main features and make comparisons where relevant.

Write at least 150 words.

IELTS Line Graph Examples - Model Answer

The line graph compares the number of car thefts per thousand of the population in four countries from 1990 to 1999. Overall, it can be seen that car thefts were far higher in Great Britain than in the other three countries throughout the whole time frame.

To begin, car thefts in Sweden, France and Canada followed a fairly similar pattern over the first five years, all remaining at between 5 and 10 per thousand. The general trend though for France and Canada was a decline in the number of vehicles stolen over the period, with both at around 6 in 1999. In contrast, Sweden experienced an upward trend, starting the period at just over 5, and finishing at just under 15.

Interestingly, car thefts in Great Britain started at 18 per thousand, which far exceeded that of the other countries. It then fluctuated over the next nine years, reaching a peak of 20 thefts per 1000 in 1996, and ending the period slightly lower than where it began, at approximately 17 per thousand.
