## **IELTS Writing Task 1 - Table**

You should spend about 20 minutes on this task.

The table shows the Proportions of Pupils Attending Four Secondary School Types Between Between 2000 and 2009

Summarize the information by selecting and reporting the main features and make comparisons where relevant.

Write at least 150 words.

## The Proportions of Pupils Attending Four Secondary School Types between

	2000	2005	2009
Spacialist Sabaala	12%	11%	10%
Specialist Schools	12.90	1170	10%
Grammar Schools	24%	19%	12%
Voluntary-controlled Schools	52%	38%	20%
Community Schools	12%	32%	58%

## 2000 and 2009.

## **Model Answer**

The table illustrates the percentage of school children attending four different types of secondary school from 2000 to 2009. It is evident that the specialist, grammar and voluntary-controlled schools experienced declines in numbers of pupils, whereas the community schools became the most important providers of secondary school education during the same period.

To begin, the proportion in voluntary-controlled schools fell from just over half to only 20% or one fifth from 2000 to 2009. Similarly, the relative number of children in grammar schools -- just under one quarter -- dropped by half in the same period. As for the specialist schools, the relatively small percentage of pupils attending this type of school (12%) also fell, although not significantly.

However, while the other three types of school declined in importance, the opposite was true in the case of community schools. In fact, while only a small minority of 12% were educated in these schools in 2000, this figure increased to well over half of all pupils during the following nine years.
